About the Conference

The conference organising committee is pleased to invite papers, case studies and interactive workshops from OHS practitioners, academics and health professionals for our 2012 conference to be held over 2 days 17th – 18th May.

Our theme is '**Harmonised Safety**' and in particular, content dealing with the following themes is sought:

- Transition to new harmonised OHS legislation
- OHS challenges in 2012
- Your OHS successes
- Meeting OHS best practice
- Improving safety culture
- Contractor Safety

The conference program and themes are designed to provide a variety of experiences for delegates. In particular, we aim to provide a stimulating mix of key note speakers, industry papers and presentations on contemporary OHS issues, interactive workshops and site visits.

We also recognise the importance of meeting and networking with other health and safety professionals during this time, and as such a Gala Dinner (17th May) has been scheduled as part of the Conference.
